PRATIKSHA TRIPATHI

Product Designer | UI/UX Designer | B2B SaaS & Enterprise UX

Uttar Pradesh, India | +91 78148 31017 | tripathi.pratiksha3555@gmail.com
Portfolio: pratikshatripathi06.github.io | LinkedIn: linkedin.com/in/pratiksha-tripathi-2b4386186

PROFESSIONAL SUMMARY

Product Designer with 3+ years of experience designing B2B SaaS platforms, enterprise dashboards, healthcare apps and e-commerce experiences. Sole product designer for Transket, a WhatsApp Business API platform built on Meta's WhatsApp Business Platform, where I owned the full product design lifecycle single-handedly, from user research and competitive analysis to information architecture, prototyping, design system and developer handoff, across 5 portals and 18+ feature areas. Skilled at turning complex, technical workflows into simple, user-centered experiences and at designing AI-powered features, using AI tools (Claude, ChatGPT, Figma AI) to speed up research and design.

CORE SKILLS

Product & UX: End-to-End Product Design, User-Centered Design, Design Thinking, User Research, Competitive Analysis, Market Research, Information Architecture, User Flows, Task Flows, Journey Mapping, Personas, Empathy Mapping, Usability Testing, UX Audits, Product Strategy

UI & Interaction: UI Design, Interaction Design, Wireframing, Low- to High-Fidelity Prototyping, Design Systems, Component Libraries, Responsive Web Design, Mobile App Design, Dashboard & Data Visualization Design, Visual Design

SaaS & AI: B2B SaaS, Enterprise UX, Multi-tenant & Role-Based Access (RBAC), Onboarding & Activation, Trial-to-Paid Conversion, Subscription & Billing UX, AI-Powered Features, Conversational UX, Chatbot Flow Design

Collaboration: Developer Handoff, Cross-Functional Collaboration, Stakeholder Management, Remote Collaboration with International Teams (Canada, US), Design Documentation

Tools: Figma, Figma AI, Framer, Adobe Photoshop, Adobe Illustrator, Adobe After Effects, WordPress, Claude, ChatGPT

PROFESSIONAL EXPERIENCE

Product Designer (Sole Designer) | Transket, Canada (Remote) **Jun 2025 – Present**

B2B SaaS · WhatsApp Business API platform built on Meta's WhatsApp Business Platform

- Owned the product design end to end as the only designer, from user research, competitive analysis and requirements through user flows, wireframes, high-fidelity UI, prototypes, design system and developer handoff, then supported developers until launch.
- Designed 5 connected products covering 18+ feature areas: Customer Dashboard, Enterprise Portal, Admin Portal, Partner Portal and the public marketing website, kept consistent through shared components, layouts and status patterns.
- Ran competitive UX analysis of WhatsApp Business tools (Wati, AiSensy, Gallabox) and defined 4 design principles that guided every product decision, focused on progressive disclosure and familiar WhatsApp patterns.
- Designed core workflows: a team Shared Inbox with chat assignment, tags and filters; a 5-step Campaign Builder for template messaging, audience selection and scheduling; a visual Chatbot / Flow Builder; contact management; WhatsApp Forms; and analytics dashboards.
- Designed Smart Analytics, an AI-powered feature where enterprise users ask questions in plain language and get insights across every organization; it became a key part of the premium Enterprise plan.
- Designed a trial activation program that rewards users with extra trial days for completing key product tasks, helping more trial users reach product value and convert to paid plans.
- Designed multi-organization account structure with role-based access control and organization switching, so businesses can manage several brands from one login without working in the wrong account.
- Simplified subscription and billing UX into a single Billing & Plan page with Stripe-hosted payment management, reducing screens users had to switch between.

- Iterated on the dashboard, inbox and billing based on stakeholder feedback and Meta platform updates; collaborated with international stakeholders, developers and business teams.

UI/UX Designer | Keyideas Infotech Pvt. Ltd. **Dec 2024 – May 2025**

Design for US-based clients

- Designed user experiences for US-based e-commerce platforms, websites, landing pages and Shopify apps, including a Ring Builder app and a Smart Filter plugin for jewelry e-commerce.
- Ran UX audits, usability evaluations and competitor analysis to find and fix usability issues and improve engagement and conversion.
- Designed responsive web interfaces and marketing assets, and worked with project managers and developers to turn business requirements into shipped designs.

Founding Member & Product Designer | Flavum HealthTech **Jun 2024 – Nov 2024**

Women's healthcare startup

- Shaped product vision and design strategy as a founding team member.
- Designed end-to-end experiences across web, mobile and tablet for health tracking, virtual consultations, appointment scheduling and medication reminders.
- Conducted user research, wireframing, prototyping and usability testing, and worked closely with developers through build.

CGI Compositor | CitrusInk Studio, New Delhi **Apr 2022 – Feb 2023**

- Composited live-action footage, 3D assets and visual effects for productions including *The Dragon Prince* Season 4 (Netflix) and *The Canterville Ghost*; built a strong eye for visual detail and fast iteration on client feedback.

SELECTED PROJECTS

- **Transket – WhatsApp Business API Platform:** B2B SaaS product designed solo from research to developer handoff (case study on portfolio).
- **CareerVerse – AI Career Exploration Tool:** AI behaviour and conversation design for a tool that suggests career paths from a user's interests, skills and goals; research synthesis, empathy map, sitemap and user flows.
- **Scholars Insight – College Discovery Web App:** End-to-end UX case study covering persona, empathy map, user flows, wireframes, design system and final UI.

EDUCATION
